COMPLETE BLOOD COUNT

HAEMOGLOBIN	: 5.9	mg/dl	12.0-15.5
Total R.B.C.	: 2.10	mill/cumm	4.5-6.2
Total Leucocyte Count(TLC)	: 4000	/cu mm	4000 - 11000
Haematocrit(HCT)	: 20.9	%	42 - 52
Mean Cell Volume(MCV)	: 99.52	fl	78 - 100
Mean Cell Haemoglobin(MCH)	: 28.1	Pg	27 - 32
Mean Cell Haemoglobin Conc.(MCHC)	: 28.23	g/dl	31 - 36
DIFFERENTIAL COUNT			
Neutrophils	: 59	%	40-75
Lymphocytes	: 38	%	20-45
Eosinophils	: 01	%	1-6
Monocytes	: 02	%	2-8
Basophils	: 00	%	0-1
ABSOULTE COUNT			
Neutrophils (Abs Count)	: 2360	/cu mm	2000 - 7000
Lymphocytes (Abs Count)	: 1520	/cu mm	1000 - 4000
Eosinophils (Abs Count)	: 40	/cu mm	20 - 500
Monocytes (Abs Count)	: 80	/cu mm	200 - 1000
PLATELET COUNT			
Platelets	: 137000	x1000/cu.mm	150000 - 450000
GENERAL BLOOD PICTURE(GBP)

SAMPLE COLLECTION FACILITY AVAILABLE

Patient ID	101301186	Patient Name	[redacted]
Age	38 Years	Sex	F
Accession No.		Modality	US
Ref. Physician		Study	
Study Date	11-Feb-2026		

ULTRASOUND WHOLE ABDOMEN

Sub-optimal evaluation due to excessive bowel gas shadows.

Liver is normal in size (13.4cm) **& shows raised periportal echogenicity - ? Subjective ?? Viral etiologuy**, IHBR are not dilated. PV & CBD are of normal caliber. No focal lesion is seen.

Gall bladder *is partially distended. Visualized lumen appear echo free.*

Pancreas head and proximal body is normal, rest is obscured by bowel gas.

Spleen is normal in size (10.4cm) & has homogenous parenchyma.

Bilateral kidneys are normal in size, shape & position. Corticomedullary differentiation is maintained. Pelvicalyceal system are not dilated. No echogenic shadow suggestive of calculus is seen.

Urinary bladder *is partially distended. Pelvis could not be assessed.*

No significant retroperitoneal lymphadenopathy is seen.

No free fluid is seen in the peritoneal cavity.

IMPRESSION:

- **No significant abnormality seen at present evaluation.**

Please correlate clinically.
