DEPARTMENT OF IMMUNOLOGY - SEROLOGY

Test Name	Result	Unit	Bio. Ref. Range	Method
HCV Rapid Card Antibody Qualitative				
Sample Type : SERUM				
HCV ANTIBODY QUALITATIVE Rapid	NON-REACTIVE		NON-REACTIVE	Immunochromatography

INTERPRETATION:

-The HCV Tri-dot is a rapid, sensitive and qualitative in-vitro diagnostic test for the detection of antibodies to hepatitis C Virus in human serum or plasma.
-False reactive result may occur due to non-specific binding of the sample to the membrane.
-The presence of Anti-HCV does not imply a hepatitis C infection but may be indicative of a recent or a past infection by HCV.
-Patients with Autoimmune liver disease may show falsely reactive results.

LIMITATIONS:

-The HCV Tri-Dot detects anti-HCV in human serum or plasma and is only a screening test. All reactive samples should be confirmed by supplemental assays like HCV RNA testing or RIBA. Therefore for a definitive diagnosis the patients clinical history, symptomatology as well as serological data should be considered. A non-reactive result does not exclude the possibility of HCV infection.

ISO 9001:2015 NATIONAL HEALTHCARE AWARDS GLOBAL Brand of the year 2024

X - RAY -RIGHT KNEE AP VIEW

OBSERVATION:

- There is total knee replacement prosthesis seen in situ, which is normally oriented.
- Lower end of the Femur, Patella and Upper ends of the Tibia and Fibula appear normal.
- Alignment is normal.
- No obvious abnormality is seen in the soft tissues.

IMPRESSION:

- There is total knee replacement prosthesis seen in situ, which is normally oriented.

Please correlate clinically

ISO NATIONAL HEALTHCARE & WELLNESS AWARDS GLOBAL Brand of the year 2024

X - RAY – RIGHT FOREARM AP & LATERAL VIEWS

OBSERVATION:

- Fracture seen at the distal shaft of radius and ulna noted with ortho-fixation metallic plate and screw seen in situ.
- Rest of the visualized bones and joints are normal.
- No sclerotic or lytic lesion is seen in the bones.
- No obvious soft tissue swelling is seen.

IMPRESSION:

- Fracture seen at the distal shaft of radius and ulna noted with ortho-fixation metallic plate and screw seen in situ.

Please correlate clinically
