Pacs Result

ULTRASOUND ABDOMEN

Liver is normal in size (11.0 cm) with increased parenchymal echotexture and wavy margins. No focal lesion seen Intrahepatic biliary and vascular radicles are normal. Common bile duct is normal in caliber. Portal vein is normal.

Previously mentioned left lobe of liver abscess with perforation and perihepatic collection appears to be completel reduced in size.
Pigtail catheter noted in situ.
Gallbladder is contracted. Few calculi noted largest measuring 15 mm within the lumen of gallbladder. Diffuse milc wall thickening measuring 4-5 Mm noted. No evidence of any pericholecystic fluid collections noted.
Pancreatic size, outline and echogenicity are normal. Peripancreatic planes are well defined. No calcification or ductal dilatation is seen.

Spleen is mildly enlarged in size, measuring 12.9 cm.

Bilateral mildly kidneys are bulky in size.

Right kidney measures 12.0 x 5.2 cm. Cortical echogenicity is normal. Corticomedullary differentiation is normal. Pelvicalyceal system is normal.

Left kidney measures 12.0 x 6.6 cm. Cortical echogenicity is normal. Corticomedullary differentiation is normal. Pelvicalyceal system is normal.

Urinary bladder is partially distended.
Prostate is normal, measures 5.0 x 4.1 x 2.8 (volume: 29 cc).

Prevoid urine measures 180 cc. Postvoid residual urine is nil.
